

Mr. Farner  
124  
57129  
124

29 Charlotte Terrace, Barnesbury  
Road, Islington, London  
North. 5th 1852.

My Dear Sir.

I am desirous of getting  
a work reviewed as extensively as  
possible in American papers.  
The author is an old and valued  
friend of mine, to whom I am  
under obligation for many  
favors. The work is one of  
much interest to your inven-  
tive and enterprising countrymen  
— the English Law of Patents.

Mr. Gay would perhaps do  
me the favor of reviewing it  
in the Standard at New York,  
and your influence might  
perhaps procure the same  
to be done in the Tribune

MS.A.1.7.v.31 p.17

the Pennsylvania Freeman  
and other journals.

I will endeavor by the  
next mail to send you a  
familiar explanation of the  
English Law of Patents, which  
may be interesting to your  
readers, and which you may  
probably feel inclined to  
adopt as your review in  
the Liberator.

I have been expecting to  
see an account of the Towner  
Hamlets' Election, which I  
sent you some two months  
back. I fear there must  
have been some miscarriage  
by mail.

Our friend Mr. Thompson I am  
happy to say is well. The loss  
of his election has not in the  
least affected his spirits.

William Wells Brown is  
doing very well. Uncle Tom  
has created a deep interest in  
American Slavery in this  
country, and Brown's lec-  
tures are well attended. His  
new work "Three Years in  
Europe, or Places I have  
met and Places I have  
seen" has been most  
favorably noticed by the  
press, and is having an  
extensive sale.

I presume you have seen  
before this the first number

of our "Anti Slavery Advo-  
cate." The cause of emancipation  
will be much indebted to  
the indefatigable labours of  
M<sup>rs</sup> Estlin and M<sup>rs</sup> Welch.

Hoping you are in the full  
enjoyment of that health  
and strength which you so  
much need in your arduous  
enterprise

I remain, Dear Sir,

Yours most truly

J. L. Garrison

P. S. It would not be a  
bad speculation for some  
American printer to print  
M<sup>rs</sup> Campbell's work
